PROBLEM STATEMENT

Despite advances in women's healthcare, many gynaecological conditions remains underdiagnosed, undertreated, or poorly managed due to a combination of limited awareness, delayed reporting, socio-cultural stigma, and inadequate access to specialized care. Common issues such as menstrual disorders, polycystic ovarian syndrome (PCOS), infertility, endometriosis and reproductive cancers often go to undetected until complications arise. There is a pressing need to enhance early diagnosis, improve patient education and implement more effective, personalized treatment strategies to ensure better reproductive health outcomes for women across all age group

PROJECT OVERVIEW

This project aims to enhance the early detection, diagnosis and management of common gynaecological conditions among women of reproductive and post-reproductive age. Through a combination of clinical evaluation, patient education, community outreach, and the integration of evidence-based treatment protocols, the project seeks to improve women's reproductive health outcomes. Special focus is placed on addressing challenges such as late diagnosis, limited access to specialist care, and the social stigma surrounding gynaecological issues.

Key Objectives

- Promote awareness and early screening for gynaecological disorders (*e.g., PCOS, endometriosis, cervical cancer*).
- Improve access to gynaecological services in underserved populations.
- Standardize diagnostic and treatment protocols.
- Empower patients through education and counselling.
- Utilize data to track outcomes and inform future inventions.

WHO ARE THE END USERS?

Women of reproductive age

Individuals seeking care for menstrual health, contraception, fertility and general reproductive well-being.

Pregnant women

Patients requiring parental, perinatal, and postnatal care and monitoring.

Adolescents

Young females needing education and early intervention for menstrual and hormonal issues.

Postmenopausal women

Individuals managing menopause-related symptoms, osteoporosis.

Couples Fertility Support

Patients undergoing evaluation or treatment for infertility

Healthcare Providers

General physicians, nurses, and midwives who collaborate with gynaecologists for referrals and shared care.

Public Health Agencies/NGOs

Organizations involved in women's health initiatives, screenings and awareness campaigns.

TOOLS AND TECHNIQUES

Ultrasound

For visualizing reproductive organs, monitoring Pregnancy, and detecting abnormalities.

Pap Smear & HPV Testing

For cervical cancer screening.

Colposcopy

To examine the uterine cavity for abnormalities
Such as fibroids or polyps.

Laparoscope

- For minimally invasive surgeries such as cyst removal, tubal ligation, and endometriosis treatment.

Electrosurgical Instruments

- For procedures like LEEP(*Loop Electrosurgical Excision Procedure*).

Dilation and Curettage(D&C) Tools

- For diagnosing or treating uterine conditions.

Cryotherapy Equipment

- For treating precancerous cervical lesions.

POTFOLIO DESIGN AND LAYOUT

Header section

- This contains the main navigation bar
- The navigation links users jump to various sections of the page.
- We can add name or logo in this section for branding.

About me

- This section introduces the gynaecologists, including the brief biography and an of image.

Services

- This section displays the services offered by the gynaecologist in a grid layout.

Qualifications

- Highlights your educational background, training, and any specializations such as a ***Fellowships in Laparoscopic surgery*** or advanced degrees like MD ***in Obstetrics and Gynaecology***.
- A ***Flexbox*** layout is used to display these qualifications in a responsive card format.

Contact

- Provides multiple ways for patients to contact you: ***email, phone, clinic address***, and links to ***LinkedIn*** and ***Instagram*** Profiles for a more personal or professional connection.
- This section makes it easy for potential patients to reach out for appointments or inquiries.

FEATURES AND FUNCTIONALITY

User-Friendly Navigation

Function: Easy and intuitive navigation to different sections of the portfolio.

Functionality: A *sticky menu* or *fixed navigation bar* that allows quick access to essential sections like *About Me, Services, Testimonials, contact*, etc.

About Me

Function: introduces the gynaecologist and their qualifications.

Functionality: A personal *bio section* with the gynaecologists *education, certifications*, and *professional* photo adds credibility.

Services Provided

Function: Showcase the services offered by the gynaecologist.

Functionality: Detailed sections of subsections that describes services like *routine exams, prenatal care, menopause management, fertility consultations*, and *surgical procedures*. This can also include interactive *icons or images* representing each services.

Patient Testimonials

- **Function:** Build trust and establish credibility.

Functionality: Display *real patient testimonials* in a dedicated section. You could use quotes, patient names and possibly photos to give it to a personal touch.

RESULTS AND SCREENSHOTS

Dr. Swethaa Sri.S
Consultant Gynaecologist | Women's Health Specialist
